

AUTOMOTIVE REFINISHING TECHNOLOGY COLLISION REPAIR TECHNOLOGY

Please see attached contest updates for these contests (update for both is one document/attachment):

- Automotive Refinishing Technology
- Collision Repair Technology

Please remember that these contests will continue off site at Caliber Collision in Morrow, GA so please ensure you have transportation to get students to that contest. Also, these contests require travel twice: On Thursday, March 12 for a mandatory orientation, the written test, and oral assessment on site at Caliber Collision (typically from 1-6pm) AND on Friday, March 13 for the contest at Caliber Collision (typically 7:30am-3pm). If transportation is an issue, please email me directly at tmazhani@tcsg.edu.

Please read this special note from the technical chair:

NOTE: If we have a student in an area and he/she lacks the required equipment, please have the instructor contact the State Director who will reach out to the Technical Chair. The Technical Chair would like to work to address equipment issues/concerns prior to the student arrival at Caliber Collision on March 12, 2020. This is a very generous offer from the Technical Chair and our industry partners to ensure all students have what they need for these 2 contests, please let us know in advance if you are not able to secure the equipment for your students through your college.

Email me directly at tmazhani@tcsg.edu with any questions, thanks!
